## 4

## LENGTH AND PERIMETER

$\mathrm{HHH}^{\mathrm{H}} \mathrm{H}$

From White Rose Maths schemes for Year 4 Autumn Term BLOCK 3 - LENGTH AND PERIMETER

1) Complete the bar model.

## 700 m

## 1 km

(2) Circle the lengths less than 600 m .

## 750 m <br> $\frac{1}{2} \mathrm{~km}$

## 60 m <br> 6 km

3) What is the perimeter of the shaded rectangle?

(4) What is 550 m less than 3 km ?
$\square$

5

Sam thinks the shapes have the same perimeter.
Do you agree?
Yes
No
Explain why.

6 Here are 3 shapes.
Shape B is a square.
Put the shapes in order of their perimeter.
Start with the greatest perimeter.

(7) Draw three different rectangles, each with a perimeter of 16 cm .

8) Here is a rectangle.

Each side is:

* a whole number
* less than 10 m

Circle the lengths that could be the perimeter of the shape.
$19 \mathrm{~m} 20 \mathrm{~m} \quad 24 \mathrm{~m} \quad 28 \mathrm{~m}$
(9) Kim cycles 5 km and 400 m . Jack cycles $3,500 \mathrm{~m}$.

How much further does Kim cycle than Jack?
(10) A rectangle has a perimeter of 24 cm .

The length of the rectangle is 10 cm .

The opposite length is also 10 cm , so the width must be 4 because

$$
10+10+4=24
$$

What mistake has Teddy made?

What is the correct width of the rectangle?

## Answers

(1) | 700 m | 300 m |
| :---: | :---: |
| 1 km |  |

(2) 60 m
(4) $2,450 \mathrm{~m}$
(5) No

The blue shape has a greater perimeter.
6) $C(24 \mathrm{~cm}), B(20 \mathrm{~cm}), A(18 \mathrm{~cm})$

7

(9) $1,900 \mathrm{~m}$
(10) Teddy has forgotten that the rectangle has four sides:
$10+10+2+2=24$
The correct width of the rectangle is 2 cm .
