1 – Statement

The school will properly support pupils at school with medical conditions so that they have full access to education, including school trips and physical education. The school will also put in place procedures to deal with emergency medical needs.

This Policy will be regularly reviewed and updated by the governing body. The overall responsibility for the effective implementation of this policy is held by the Head teacher.

The school will work together with local authorities, health professionals and other support services to ensure that children with medical needs receive a full education. In some cases this will require flexibility and involve, for example, programmes of study that rely on part-time attendance at school in combination with alternative provision arranged by the local authority. Consideration will be given to how children will be reintegrated back into school after periods of absence.

No child with a medical condition will be denied admission or prevented from taking up a place in school because arrangements for their medical condition have not been made. However, in line with our safeguarding duties, we will ensure that pupils' health is not put at unnecessary risk from, for example, infectious diseases. We retain the right not to accept a child at school at times where it would be detrimental to the health of that child or to others.

2 - Procedures

The following procedures are to be followed when notification is received that a pupil has a medical condition.

2.1 A parent or a health care professional informs the school that:

- a child has been newly diagnosed, or;
- is due to attend a new school, or;
- is due to return to school after a long-term absence or
- has medical needs that have changed.

2.2 The SENCO leader co-ordinates a meeting to discuss the child's medical support needs, and identifies the member of school staff who will provide support to the pupil.

2.3 A meeting will be held to discuss and agree on the need for an Individual Healthcare Plan (IHCP). The meeting will include key school staff, child, parent, relevant healthcare professional and other medical/healthcare clinician as appropriate (or to consider written evidence provided by them).

2.4 An IHCP will be developed in partnership, and the meeting will determine who will take the lead on writing it. Input from a healthcare professional must be provided.

2.5 School staff training needs will be identified.

2.6 Healthcare professional commissions or delivers appropriate training and staff are signed off as competent. A review date for the training will be agreed.

2.7 The IHCP will then be implemented and circulated to all relevant staff.

2.8 The IHCP will be reviewed annually or when the medical condition changes. The parent or healthcare professional will initiate the review. Reviews can occur quite often especially in the

early stages when there is a degree of experimentation required with medication to find out what is most effective. Equally information gleaned from the experience of administering medication at school can also have an effect on the plan. Generally the expectation is that it will be the parents to confirm changes in writing to the school and it will be for the school to alter the plan to reflect this information.

2.9 For children starting at a new school, arrangements should be in place in time for the start of the relevant school term. In other cases, such as a new diagnosis or children moving to a new school mid-term, every effort will be made to ensure that arrangements are put in place within two weeks.

3 – Individual Healthcare Plans

3.1 Not all pupils with medical needs will require an IHCP. The school together with the healthcare professional and parent will agree, based on evidence, whether a healthcare plan would be inappropriate or disproportionate. If consensus cannot be reached the Head teacher will take the final view.

3.2 The format of the IHCP will depend on the child's condition and the degree of support needed. Where a child has SEN but does not have a statement or EHC plan, their special educational needs will be mentioned in their healthcare plan.

3.3 The following will be considered when deciding what information will be recorded on IHCPs:

- The medical condition, its triggers, signs, symptoms and treatment;
- The pupil's needs including medication and other treatments;
- Specific support for the pupil's educational, social and emotional needs;
- The level of support needed (some children will be able to take responsibility for their own health needs) including in emergencies;
- Who will provide this support, their training needs, expectation of their role and confirmation of proficiency, and cover arrangements for when absent;
- Who in school needs to be aware of the child's condition and required support;
- Arrangements for written permission from parents and the Head teacher for medication to be administered by a member of staff or self-administered by the pupil during school hours;
- Separate arrangements or procedures required for school trips or other school activities outside of the normal school timetable that will ensure the child can participate e.g. risk assessments;
- Where confidentiality issues are raised by the parent/child, the designated individuals to be entrusted with information about the child's condition; and
- What to do in an emergency, including whom to contact, and contingency arrangements. Some children may have an emergency healthcare plan prepared by their lead clinician.

4 – Roles and Responsibilities

4.1 Governing body

- Must make arrangements to support pupils with medical conditions in school, including making sure that a policy for supporting pupils with medical conditions is developed and implemented.

- Ensure that sufficient staff have received suitable training and are competent before they take on responsibility to support children with medical conditions.

4.2 Head teachers

- Ensure that their school's policy for supporting pupils with medical needs is developed and effectively implemented with partners. This includes ensuring that all staff are aware of the policy and understand their role in its implementation.
- Ensure that all staff who need to know (including first aiders) are aware of the child's condition.
- Ensure sufficient number of trained staff are available to implement and deliver all required IHCPs.
- Have overall responsibility for the development of IHCPs, including contingency and emergency arrangements.
- Ensure that school staff are appropriately insured and are aware they are insured to support pupils in this way.
- Ensure the school nurse is aware of children with medical conditions.

4.3 School staff

- Any member of school staff may be asked to provide support to pupils with medical conditions, including the administering of medicines, although they cannot be required to do so.
- Should receive suitable and sufficient training and achieve the necessary level of competency before they take on responsibility to support children with medical conditions.
- Should know what to do and respond accordingly when they become aware that a pupil with a medical condition needs help.

4.4 School nurses

- Responsible for notifying the school when a child has been identified as having a medical condition which will require support in school.
- Support staff to implement IHCPs, providing advice and training.
- Liaise with lead clinicians locally on support for child and associated staff training needs.

4.5 Healthcare professionals (GPs etc)

- Notify school nurse when a child has been identified as having a medical condition that will require support at school.
- Provide advice on developing IHCPs.

4.6 Pupils

- Full involvement in discussions about their medical support needs.
- Contribute to the development of, and comply with, IHCP.

4.7 Parents

- Provide the school with sufficient and up to date information about their child's medical needs.
- Contribute to the development of the IHCP.

- Carry out any action they have agreed to as part of the IHCP implementation.

4.8 Local Authority

- Provide support, advice and guidance, including suitable training for school staff, to ensure that the support identified in the IHCP can be delivered effectively.
- Where a pupil would not receive a suitable education in a mainstream school because of their health needs, to make other arrangements.

5. Staff Training and Support

5.1 Any member of school staff providing support to a pupil with medical needs will receive suitable training.

5.2 The relevant healthcare professional will normally lead on identifying the type and level of training required. The training will be sufficient to ensure that staff are competent and have confidence in their ability to support pupils with medical conditions.

5.3 School staff will not give prescription medicines or undertake healthcare procedures without appropriate training.

5.4 All school staff will be made aware of the school's policy for supporting pupils with medical conditions, and their role in implementing that policy.

6. Child's Role in Managing Their Own Medical Needs

6.1 Where a child is deemed competent to manage their own health needs and medicines, this should be reflected in their IHCP.

6.2 Wherever possible children will be allowed to carry their own medicines and relevant devices, and to access their medicines for self-medication quickly and easily, but with an appropriate level of supervision.

7. Managing Medicines on School Premises

7.1 Medicines will only be administered at school when it would be detrimental to a child's health or school attendance not to do so.

7.2 No child under 16 will be given prescription or non-prescription medicines without their parent's written consent. With HT/DHT discretion prescription or non-prescription medicines may be administered with witnessed verbal consent. (ie two staff have spoken with the parent carer to confirm consent.)

7.3 No child under 16 will be given medicine containing aspirin unless prescribed by a doctor.

7.4 Wherever possible prescribed medicines should be taken outside school hours.

It is recommended that any antibiotics which need to be taken 3 times per day are taken before school, after school and at bedtime dependant on the doctor's instructions.

7.5 The school will only accept prescribed medicines that are in-date, labelled, provided in the original container as dispensed by a pharmacist (except insulin which may be in a pen or pump) and include instructions for administration, dosage and storage.

It is the responsibility of any person administering medicines to check that the medicine is in date. If it is not it must not be given and a parent contacted.

Parents are asked to ensure all medicine given to the school office is in date. It will be checked when received. Parents are reminded to make a note of the dates on asthma inhalers before handing into school and arrange to bring new ones to school when required.

7.6 All medicines will be safely stored in a location which is known and accessible to the child.

When medicine is handed into the school office it must be signed in and locked in the first aid cupboard located in the school office. The only exception is for asthma inhalers which are kept in the classroom in a location agreed with the class teacher. Each class must have a copy of the request/record of prescribed medication administered to a pupil form so they know the exact dose required and any special precautions.

7.7 Where a child has been prescribed a controlled drug, they may legally have it in their possession if they are competent to do so, but passing it to another child is an offence and will be dealt with accordingly.

7.8 The school will keep a record of all medicines administered to individual children stating what, how and how much was administered, when and by whom.

7.9 When no longer required medicines will be returned to parents to arrange for safe disposal.

When a course of medicine has been completed the medicine must be returned to the parent who must sign the request/record of prescribed medicine administered in school form to say they have had the medicine returned. In the instance that a parent does not collect the medicine after being repeatedly asked office staff are authorised to take the medicine to a pharmacy for disposal. The disposal of medicine part of the request/record of prescribed medicine administered in school form must be completed.

8. Emergency Procedures

8.1 Each IHCP will clearly define what constitutes an emergency and explain what to do, including ensuring that all relevant staff are aware of emergency symptoms and procedures.

8.2 If a child is taken to hospital, a member of school staff will stay with the child until the parent arrives.

9. Use of Emergency Salbutamol Inhalers

9.1 From October 2014 schools have been allowed to keep salbutamol inhalers and spacers for use in emergencies. Emergency prescribed inhalers can be provided by parents/carers and are kept in the school office First Aid cabinet available for emergency use, should a child who already has a prescription inhaler and the inhaler is unable to be used for some reason.

10. Use of Emergency Auto Adrenalin Injectors

10.1 From October 2017 schools have been allowed to keep auto adrenalin injectors for use in emergencies. Emergency auto adrenaline injectors can be provided by parents/carers and are kept in the school office First Aid cabinet available for emergency use, should a child who already has a prescription injector and it is unable to be used for some reason.

11. Defibrillator Provision

11.1 A defibrillator is a machine used to give an electric shock to restart a patient's heart when they are in cardiac arrest. The school does not currently have a defibrillator. (*The nearest is located in Warmley Rangers grounds*)

12. Day Trips, Residential Visits and Sporting Activities

12.1 Pupils with medical conditions will be actively supported to participate in school trips and visits, or in sporting activities.

12.2 School will consider what reasonable adjustments may be required to enable children with medical needs to participate fully and safely on trips and visits. This will be considered as part of the activity risk assessment to take account of any steps needed to ensure that pupils with medical conditions are included. The school will administer emergency short term medication as part of a school trip. If parents wish the school to administer such medication this must be indicated on the consent form. The consent form gives parents the opportunity to flag up any particular needs of the pupil, e.g. medical, dietary etc.

13. Unacceptable Practice

13.1 The following is regarded by the school as unacceptable practice:

- Preventing children from easily accessing their inhalers and medication;
- Assuming that every child with the same condition requires the same treatment;
- Ignoring the views of the child, parents or medical professionals;
- Sending children with medical conditions home frequently, or preventing them from staying for normal school activities;
- Penalising children for their attendance record if their absences are related to their medical condition;
- Preventing pupils from drinking, eating or taking toilet breaks whenever they need to in order to manage their medical condition effectively;
- Requiring parents to attend school to administer medication or provide medical support to their child including toileting issues; and
- Preventing children from participating, or creating unnecessary barriers to children participating, in any aspect of school life, including school trips.

14. Liability and Indemnity

14.1 The school has public liability and employer's liability insurance in place.

15. Complaints

15.1 If parents or pupils are dissatisfied with the support provided by the school to pupils with medical conditions, they should discuss their concerns directly with the school. If the issue remains unresolved, they may make a formal complaint via the school's complaint procedure. The school's complaint policy and procedure details are available on the school website. <http://www.redfieldedgeprimary.co.uk/policies>
